1.	(2 points)	What is the difference between interrupt and trap?

A. pipe and threads B. fifo and threads

C. sockets and processes D. sockets and threads

Op	eraung sy	stem Laboratory Final - Fage 2 of 5 18 Dec 20.	10
2.	computer	A hardware device wishes to transfer information to the main memory of the for access by an application. Which of the following mechanisms cannot has purpose?	
	A.	direct memory access	
	В.	polled mode operation	
	С.	programmed I/O	
	D.	zombie processes	
3.	(1 point)	Which one of the following system calls is related to process creation?	
	A.	execl	
	В.	read	
	С.	write	
	D.	send	
4.	(1 point)	Which one of the following functions can be used as a thread handler?	
	A.	void *handler(void *)	
	В.	int handler(int, int)	
	С.	void *handler(char *, int *)	
	D.	boolean handler(string, string)	
5.	(1 point)	Which choice is not a way for thread synchronization?	
	A.	mutex	
	В.	semaphore	
	С.	spinlock	
	D.	pipe	
6.	(1 point)	Is there any way to have a shared value in multiple process?	
	A.	Yes	
	В.	Yes but it works only after the value is changed	
	С.	Yes but it does not reflect the changing	
	D.	No	
7.	(1 point)	Which relationship is meaningful?	

8.	A.	Linux only supports IP in network layer? true
9.	(1 point) A.	false POSIX is a standard that defines how network protocol works? true false
10.		What do you think about our class and this exam? Do you consider our class
